Continuation of Substance of Interview including description of the general nature of what was agreed to if an agreement was reached, or any other comments: Mr. Thompson questioned where in the cited prior art there are two different formats for encrypting the original multimedia channel keys. Examiner's interpretation is that Richards teaches a customer code which is used to encrypt the channel keys disclosed, where Richards also teaches that each customer code is unique to each customer (col. 10, lines 34-35). Since the original channel keys are encrypted with a customer code unique to each receiver, Examiner interprets this as encrypting the original channel keys with (at least) two different encryption formats (since the term encryption format is broad). Examiner will review any further amendments/arguments when filed.
